Description

{deco}

Firing range: 1080-1120C

Stir contents of jar thoroughly before use.

To assist application remove a small quantity of glaze into a separate container and dilute with hot water.

Apply using a well laden soft brush as large as the project will allow.

Brush on three even coats to bisque ware in opposite directions.

Crackle effect can be highlighted after firing by the application of crackle ink.

Formulated for use over white earthenware bodies- testing is recommended over coloured clays.

Crackle glazes are not suitable for functional ware.
