Description

Classic stainless steel rib - an essential tool for every potter

Essential for every pottery project

This flexible stainless steel kidney-shaped rib is one of those essential tools that every potter needs for any project, large or small, wheel thrown or hand built. The smooth surface and edges are useful for shaping, smoothing and finishing the clay.

Reliable

This flexible rib is made from quality stainless steel, making it durable and long lasting. It's also an affordable tool to buy in multiples for pottery studios and classrooms.

Easy to use

The rib is lightweight, thin and flexible. It's comfortable to hold and is useful for sculpting, shaping, molding and smoothing. Because it is thin and flexible, it's important to use it carefully as the edges can be quite sharp.
