Description

Introducing our cutting-edge solution for unparalleled heat insulation – the "Back-up" and "Hot Face" Ceramic Insulated Fiber Blankets. Engineered to excel in high-temperature environments, these remarkable blankets are designed to provide exceptional thermal protection for a wide range of industrial applications.

The "Back-up" and "Hot Face" Ceramic Insulated Fiber Blankets redefine heat management. With a thickness of 25mm (1 inch) and a width of 610mm (24 inches), these blankets offer substantial coverage for your insulation needs. Their advanced ceramic fiber composition ensures outstanding heat retention, making them the perfect choice for applications requiring reliable insulation against extreme temperatures.

The "Back-up" blanket is designed to withstand temperatures of up to 1260 degrees Celsius, providing exceptional insulation and stability for a wide array of applications. For even higher-temperature environments, the "Hot Face" blanket steps up, offering reliable performance up to 1400 degrees Celsius. Whether you're dealing with furnaces, kilns, ovens, or industrial equipment, these blankets have you covered.
