Description

Our handmade, polished hardwood modelling tools are used and relied upon by potters around the country for shaping, smoothing, texturing, cutting and refining their ceramic projects.

Beyond a chunk of clay

Pottery is more than just a chunk of clay. Whether shaping your piece on a pottery wheel, hand building with pinch pots, coils or slabs, or sculpting, potters rely on tools to turn their clay into their creative masterpieces. Our double ended modelling tools will allow you to produce a beautiful result effortlessly and consistently, every time.

Variety is best

At Pottery Supplies we offer an impressive selection of different double ended modelling tools – all made with polished hardwood to ensure a splinter-free, smooth hold. Each tool has its own unique shape and size, giving you a variety of options for creating your own unique detail in your work. Choose a favourite or invest in multiple different shapes to take your pottery to the

next level.

This particular modelling tool (PF2401) has a rounded metal ribbon loop of 7mm on one end – perfect for trimming clay from small and delicate areas. It has a curved nail shaped wooden end – useful for shaping or making scale-like imprints.

Comfort and total control

These modelling tools are perfect for shaping, refining, patterning, or smoothing your ceramic projects. Each of them being double ended effectively gives you double the options. Made of polished hardwood they are smooth, splinter free and comfortable to hold, giving you maximum control.

Dimensions: Total length 150mm. Diameter of metal ribbon loop 7mm. Wooden nail shaped end 12mm wide.
