Description

The most versatile and useful tool in every pottery studio – carve, incise, mark, score, pierce and finish with our selection of needle tools

A needle tool, which is essentially a sharp needle set into a handle, is used in so many ways no matter your project or skill level.

Versatility for every pottery project

Needle tools are used to carve, incise, mark, score and finish your pieces in progress. While working at the wheel use it to measure the depth of your clay bases or trim off those pesky uneven rims. Also useful for piercing air pockets and unclogging glazed holes.

Variety is best

At Pottery Supplies we have a choice of 3 different needle tools for you – pick your favourite, or pick them all. Choose from:

- Aluminium Pro Needle - a metal needle of approximately 1mm diameter with an aluminium handle. Handle length 125mm. Total length 170mm.

- Fine needle – metal needle of approximately 1mm diameter a with wooden handle. Handle length 100mm. Total length 140mm.
- Thicker needle - metal needle of approximately 2mm diameter a with wooden handle. Handle length 100mm. Total length 140mm.

The potter's best friend

A needle tool is always within reach, regardless of whether you are working at the wheel or hand-building your projects. Our needle tools are affordable so potters can buy them in multiples for classrooms and large studios.

Dimensions:
