Description

Firing range: 1080-1120C - brush on earthenware glaze.

*The image shown is this glaze applied to terra cotta clay.

Manufacturer's instructions:

Shake or agitate the container vigorously, then stir, before use. Apply one even coat with a soft brush, let the "wet" look disappear, then apply a second coat in the opposite direction. When the second coat has lost its "wet" look, apply a third coat in the same direction as the first.

Keep lid tightly closed during storage and if thickening occurs add a SMALL amount of water.

Food safe - no lead frit is used in the manufacture of this product.
