Description

The Small Bowl Rib is designed to give as many radius sweeps on the clay as needed. With a smaller curve in the front and a bigger curve in the back, this is a workhorse of a rib. The Small Bowl Rib rib will become an indispensable tool, particularly if you love throwing round forms.

All of our polymer ribs are made of unique flexible materials that are resistant to wear and the formation of burrs. We've found that with general use these ribs become burnished over time. This polymer rib shape is available in the following flexibility options:

- Red - Very Soft
- Yellow - Soft
- Green - Medium
- Blue - Firm
