Description

Our sharp, metal, single ended larger ribbon tools can be depended on to help you shape your clay into your creative masterpieces.

Reliable workhorse

These larger single ended ribbon tools are useful for removing substantial amounts of clay – whether you want to turn or trim your larger wheel thrown pieces, hollow out a hand built piece, or scrape away clay to reveal your sculpted masterpiece.

Variety is best

At Pottery Supplies we offer a good selection of different larger single ended ribbon tools – all made with sharp ground steel ends of different shapes and sizes. This enables you to experiment with different techniques and achieve a wide range of effects in your pottery. Choose a favourite or invest in multiple different tools to take your pottery to the next level.

This particular larger single ended tool (PF1101) has an angled loop with a straight edge (approximately 30mm wide), a broader curve and a tighter curve.

Durable

These larger single ended ribbon tools are perfect for working off more substantial amounts of clay from your bigger pottery projects. They are made with a sturdy, polished wooden handle and the metal ribbon loop is secured with wrapped metal coiling. The ribbon's sharp edge makes them versatile for switching between a fine white porcelain through to the groggiest of clay bodies.

Dimensions: Total length 180mm. Loop with straight edge (about 30mm wide), broader curve (about 15mm diameter) and tighter curve (about 10mm diameter)
