Description

Reproduce consistent tiles, every time!

Reliable and consistent results

Produce tiles galore with reliable and consistent results every time using our range of quality, stainless steel tile cutters. The hard steel edge is durable and will remain sharp through many years of tile projects.

Variety is best

At Pottery Supplies we offer a variety of different shapes and sizes of tile cutters. This particular cutter (CD5302) is square with sides that are 10cm long.

Easy and simple to use

These steel tile cutters are easy to use and clean. Simply place the cutter over the slab of clay and press down on the steel handle, then remove the tile from the cutter by pressing the plunger. This makes it much easier to remove your fresh clay tile and helps keep your tiles flat.

Dimensions: Square cutter with 10cm sides
